DIY dog rope toy

1

To make this awesome toy for your canine companion, you'll need four long strips of felt that are each about 10 centimetres wide.

2

Lay two of the felt strips on top of each other. Then lay the other two strips on top of each other. Tie the top of these together in a knot.

3

Spread out the four strips so that they make a cross.

4

Take the piece of felt at the top of your cross and fold it over the piece on the right, leaving a small loop.

5

Take the piece of felt on the right and fold it over to the left.

6

Take the piece of felt at the bottom and fold it over to the top.

7

Take the piece of felt on the left, fold it over to the right, and pull it through the loop you left there.

8

Pull two pieces of felt at a time on opposite sides, a little bit at a time, until the loops get smaller and the braid tightens.

9

Repeat the steps to continue the braid, pulling it tight as you go.

10

When you're near the end of your felt strips, tie the ends together in a tight knot. Voilà! A cheap and fun dog toy for your furry friend!
